**SEI M14 EXTENDED BOLT STOP/RELEASE, P/N 2003**

A must for high stress or cold weather applications. Developed initially for US Navy SEALs

At long last an extended bolt release with serrated thumb pad for the M14 rifle that will provide a positive release when wearing gloves or when speed of operation is a must. Absolutely essential item in cold weather. Extremely tough and properly heat-treated 8620 steel used for long service life on this critical component. Now standard issue on US Navy, USAF and USCG MK14 Mod O rifles and the US Army M-14SE. *Note: Retail availability may be limited due to ongoing military requirements.*

*SPECS: 8620 steel, RC 35-38 Internal, RC 60 Surface, black parkerized per MIL SPEC*
