**SMITH ENTERPRISE VORTEX® 7.62MM M240B/MAG-58 FLASH
ELIMINATOR, P/N 1001AV AND BLANK FIRING ATTACHMENT (BFA),
P/N 1024**

New enhanced design now supports use of SEI Direct Connect sound suppressor.

(Fig 1) SEI M240B/MAG-58 Vortex Flash Suppressor

The world's most effective flash eliminator is now available for the M240 and MAG-58 General Purpose Machine Guns. Based on the combat-proven Vortex system, the definitive development of the patented Vortex design now features a 40% increase in structural rigidity. This new version also enables the use of SEI's Direct Connect (DC) 7.62 GPMG sound suppressor. The new M240 model features our patented 15-degree helix, guaranteeing a complete propellant burn and negligible flash, unlike the standard issue closed-end "bird cage" unit or competing straight-flute designs. Right hand helical flutes will not loosen under sustained fire. The aligning of exiting gases helps to improve accuracy.

(Fig 2) SEI M240/MK 48/MAG-58 BFA.

The new Blank Firing Adaptor (BFA), suitable for the new USN MK48 Lightweight GPMG, in addition to the M140B and MAG-58 GPMGs, is machined from 8620 steel and features a hardened 416 stainless steel shaft for long service life. The body of the BFA is supplied in a durable powder coat finish. The robust dimensions, manner of construction and use of high-grade materials offer a quantum improvement over the current issue item. Also, a grenade ring is attached to the center shaft to prevent loss in the field.

SPECS: M240 Vortex -- 8620 steel, heat-treated, RC 35-38, black parkerized per MIL SPEC. 25/32 x 24 (Right) TPI, 0.0985" diameter, 2.900" long, 0.36 lbs wt.

Part Number	Item Description
Part No. 1001AV	M240B Vortex Flash Eliminator
Part No. 1024	M240/MK48/MAG-58 Blank Firing Adaptor (BFA)
