### **SMITH ENTERPRISE VORTEX® .30 CAL./6.8MM SPC FLASH ELIMINATOR, P/N 1000V , 1000V-Noveske**

**New enhanced design now supports use of SEI Direct Connect sound suppressors.**

The world's most effective flash eliminator is now available for the several AR-based semiautomatic .308/7.62mm NATO caliber weapons and similar weapons, as well as for bolt-action rifles (e.g. M24A2 SWS, M40A3, etc.). This design is also optimal for 6.8mm SPC caliber weapons. P/N 1000V now supersedes discontinued P/N 1068V.

P/N 1000V is for weapons that now use the standardized 5/8 X 24 X .730" thread specification.

P/N 1000V-Noveske is for weapons that use a 5/8 X 24 X .635" thread specification, including the DPMS Panther™ series.

Based on the combat-proven Vortex® system, the definitive development of the patented Vortex design now features a 40% increase in structural rigidity. This new version also enables the use of our Direct Connect 0.30 caliber sound suppressor\*. The new Vortex® model features our patented 15-degree helix, guaranteeing a complete propellant burn and negligible flash, unlike the standard issue closed-end "bird cage" unit or competing straight-flute designs. Right hand helical flutes will not loosen under sustained fire. The aligning of exiting gases helps to improve accuracy.

*SPECS: 8620 steel, heat-treated, RC 36-38 internal-- RC 58-60 external, black parkerized per MIL SPEC. 5/8" x 24 TPI x .730" depth of thread. Major diameter .905" x 3.00" long. Minor diameter .860" x 2.480" long. OAL 3.003". 0.28 lbs. wt.*

**Part No. 1000V SEI Vortex Flash Eliminator, Cal. .30 Cal./6.8mm SPC**

**Part No. 1000V-Noveske SEI Vortex Flash Eliminator, Cal. .30 Cal./6.8mm SPC**

**\*NOTE:** SEI sound suppressors are only available to USG/LE/FMS customers and through direct factory sales.
